

# Dmitry Popov

DevOps Engineer

✉ me@holyshrimp.xyz | 🌐 holyshrimp.xyz | 💼 dmipopov | 🚗 holyshrimp | 📍 Yerevan, Armenia

## SKILLS

Programming	Python   Golang   Javascript   Bash
Linux	Ubuntu   Debian   CentOS   AlmaLinux
Containers	Kubernetes   Openshift   Docker
Cloud	AWS   Yandex Cloud
IaaS	Terraform   Packer   Ansible
CI/CD	Gitlab CI   Github Actions   Bamboo   Jenkins
Deploy	Helm   Helmfile   ArgoCD   Flux
Observability	Prometheus   VictoriaMetrics   Grafana   Sentry
Logging	Elasticsearch   OpenSearch   Logstash   Loki   Fluentd   Fluentbit
Message Brokers	Kafka   RabbitMQ
Databases	PostgreSQL   MySQL   Redis

## WORK EXPERIENCE

**Lamoda Group** | Senior DevOps Engineer Jul 2023 - present | Yerevan, Armenia

- Leading migration from Bitbucket/Bamboo to GitLab: instance deployment, runners, backups, CI/CD components
- Managing containerized environments with Kubernetes and Docker
- Utilizing AWS and Yandex Cloud for cloud services
- Implementing IaaS with Terraform, Packer and Ansible
- Deploying applications using Helm, Helmfile and ArgoCD
- Ensuring observability with Prometheus, VictoriaMetrics, Grafana and Sentry
- Managing logs with Elasticsearch, OpenSearch, Logstash and Loki
- Developing automation and tools with Python

**Sberdevices** | DevOps Enginner Mar 2022 - Jul 2023 | Moscow, Russia

- Automated development and deployment with Gitlab CI
- Managed and deployed containers using Docker, Gitlab Container Registry, Helm and Openshift/Kubernetes
- Implemented Trivy and Sonarqube for container image vulnerability scanning
- Monitored infrastructure performance with Prometheus and Grafana
- Deployed reverse proxies using Nginx and Traefik
- Built internal backend services with Django, FastAPI and Flask, developed automations scripts with Python

**Huawei RRI** | DevOps Engineer Nov 2021 - Feb 2022 | Moscow, Russia

- Automated server provisioning and configuration with Terraform and Ansible
- Maintained and Developed ChatOps backend service and repository synchronization using Python and FastAPI
- Developed Jenkins CI/CD pipelines with Groovy scripts

**Aktiv Company** | Junior DevOps Engineer Dec 2020 - Nov 2021 | Moscow, Russia

- Automated builds, tests and deployments with Jenkins/Gitlab CI and Docker Swarm/Kubernetes
- Developed automation scripts in Python and Bash
- Deployed Nexus Repository Manager
- Set up EFK stack for log analysis
- Troubleshoot production issues and supported the development team

## EDUCATION

Master's degree in Information Security **HSE University**

## LANGUAGES

Russian Native  
English C1
